think that the majority of the citizens of that town are not, at present, in favor of annexation, - at least, not in favor of the annexation of a part, only, of the town. But the testimony which we have taken on the subject, and the arguments which have been addressed to us; - after a very careful consideration of the matter in all its bearings, your Committee are of the opinion, that the question of the annexation of Dorchester and Winthrop needs to be [illegible] in other adjoining towns. Petitions have been already presented to the Legislature, for the annexation of Dorchester, Charlestown, Chelsea, Winthrop, and Roxbury, - other towns, which petitions have all been referred to this Joint Committee. It is deemed [illegible] by your Committee, that the best interests of the City require that it should not be [illegible] at the present time. The questions involved in the consideration of this subject of further annexation of territory, are important to be disposed of except upon some comprehensive and systematic plan. Dec. 31. 1868

Whereas it appears by the City Engineers Records that 186 3/10 square feet of land were taken from Samuel Whitwell and 146 1/10 square feet from John Williams & wife on Federal Street December 9. 1861 at no expense to the City, they agreeing to give the land taken from their estates upon the condition that the City would construct the widening of said Street between Channing and Williams Streets, which condition was complied with on the part of the City; and whereas the Estates of the said Whitwell and Williams have recently been assessed under the Betterment Law (so called) respectively $203.7. and $175.00, to pay a portion of the expense of widening said Street between Williams and High Streets: and whereas in the opinion of this Board the land so given by the said Whitwell and Williams was of more value to the City than the amounts assessed upon the said parties: It is therefore Ordered: That the assessments of two hundred three and 7/100 dollars, and one hundred and seventy-five dollars made December 30th 1867 respectively upon the Estates of Samuel Whitwell and John Williams on Federal Street be and the same hereby are revoked. to surrender to the City as they have a right to do under the Letter
[illegible] and the Ordinance. The Committee
finds some suitable and convenient place is offered for the deposit
of the earth, which it is now easy to remove, and which is estimated
at 2375 dollars. It appears to us that the success of the Park Hill
improvement depends in a good measure upon the occupation of
the flats in the immediate vicinity; and it will be time enough to
arrange this work when some definite action is taken by the State
in regard to the occupation of the South Boston Flats, and Council un-
til the City take some action in regard to the raising of the
Church Street territory. So far as the cost of widening and grad-
[illegible] is estimated in the Board of Aldermen, no provision is made
for damages on account of the discontinuance of certain streets &
places, necessarily caused by the change of grade. To prevent the
occurrence of heavy damages on that account the Committee be-
lieve that it would be more economical to devise some plan for the
grading of not this territory (covering about Eighteen acres) and the
raising all of Streets and squares thereon, and when a suitable place
is found for the deposit of the earth, the plan should be carried out
without delay. If it is proper that the Board of Aldermen should
originate and matters in relation to the widening of streets, the Com-
mittee would recommend, that the Council non-concur in the pass-
age of these orders, and that the Aldermen instruct for them an
order authorizing a loan of twelve thousand dollars to pay for the

The Committee on Paving would respectfully report, that an additional appropriation of Ten thousand dollars will be required to meet the wants of the Paving Department during the remainder of the financial year. The original

requirements thereof in the present financial year.

The original appropriation was	$20,000.00
Of which there has been expended to date	18,389.20
Leaving unexpended and available	1,610.80
There will be required:	
For the March Payrolls	1,698.50
For the Salaries of the City Engineer & the City Surveyor	1,375.00
For Incidental Expenses, Stationery, Instruments,	
cleaning materials &c.	300.00
	$3,373.50
Deduct amount unexpended and available, as above	1,610.80
Estimated additional amount to be appropriated	

The deficiency has been occasioned by an increase in the salary of the City Engineer, by an increase in the wages of the employees by a vote of the Committee, and by extra time and services made necessary by an extraordinary pressure of work. The Committee, therefore respectfully ask for an additional appropriation of one thousand two hundred dollars. For the Committee. Albert F. Nath, Chairman. Read and referred to the Committee on Finance. Sent down for concurrence. March 12 Came up concurred.

The Committee on Finance Read

and Widening Read respectfully report, that an additional appropriation of thirty thousand dollars will be required before the close of the present financial year, [illegible]

during the past and present years by authority of Orders passed by the City Council. The appropriation asked for, at the beginning of the present financial year, was $20,000, the amount granted

[illegible] $111,000. the unexpended balance of loans brought from 1886, and added to the appropriation, was $ 67,261.16 making the total appropriation carried over May 1, 1887, $ 227,261.16. An additional appropriation of $50,000 was made January 7, 1887 making the total appropriation for the year to the present time, $277,261.16

The amount of claims and bills already paid from the appropriation of $276,261.38

In addition to this, orders to pay have passed, and are in the hands of the Auditor, amounting to 129.08

There are certain claims unsettled for widenings and alterations which have been made during the past and previous years, estimated at 4,556.95

Making a total of $ 280,947.41

Deduct appropriation 276,261.16

Leaving a balance unprovided for $ 4,686.75

The Committee on the Common think only a portion of the above balance of unsettled claims will be adjusted and paid before the close of the present financial year. They estimate that for this purpose Thirty Thousand dollars will be sufficient to the claims submitted. Nelson Tribbe, Joseph F. Paul, Edward J. White, Committee.

Ordered, that the Committee on Finance be directed to make such provision in the Ordinance

Ordered, that the City Council be requested to pass an order authorizing the Committee on Appropriations to include in the financial year 1888 by the Finance Ordinance, the sum of $ 4,686.75 to pay claims for widenings and alterations of streets made during the past and previous years, and that the Committee on Finance, be the same is hereby instructed to estimate the amount of money which will be required to defray the expenditures of the city of Boston

and the county of Norfolk, for the financial year beginning with the first day of May 1862, and ending with the thirty-first day of April, 1863.

The estimated expenditure amounts to $7,056,07[illegible]

The estimated income amounts to 1,378,6[illegible]

Leaving the amount to be raised by taxation $ 5,677,425

Add to which, 5 per cent of the amount of taxes which will not be paid into the Treasury during the financial year 170,323

Leaving for the judgment of the Legislature $5,847,748

The amount raised by taxation in the city of Boston last year was $4,654,411; and by the city of Roxbury, $514,173.50, making a total of $5,168,584.50. The estimated expense for the next financial year commencing May 1, 1862 is by $ 5,847,748 which is more, than $1,328,655.50 will then that of last year for the same. The decrease of the amount of taxation the coming financial year in the consolidated cities, in face of the yearly increased amounts asked by the several departments necessarily occasioned by the annexation of Roxbury to our city, is caused by the reduction of the State tax from $5,000,000 to $ 2,000,000; of which amount the consolidated cities pay $725,140; Boston paying = 1,094,150 and Roxbury $13,70 last year; and also the reduction in the amount of premium to be paid upon the real debt from $413,000 to $ 63,500. The Committee of Finance of the Massachusetts House of Representatives have not reported, as yet the tax to be assessed by the State Tax; but from information obtained from the Hon. George Walker of Springfield, Chairman of said Committee, I learn that the maximum amount to be assessed upon the several cities and towns of the Commonwealth will not exceed $ 2,000,000, our proportion of which in round numbers is placed in the Estimates. The amount asked for the pay

March 1868

ment of school tax which is increased $1,000 more than it would ordinarily be, in consequence of the recommendation of the Treasurer and Auditor of account of a change from quarterly to monthly payment of said salaries. The first year change involves twelve months' payment to the High and Grammar, and four-teen to the Primary School teachers. This change, confidently believed from my personal knowledge, is needed from the actual & pressing want of many of the female teachers employed in this important service, and I am happy to say that it has had the unanimous approval of the Finance Committee of Public Schools of the City Council. With this alteration in the mode of payment the Treasurer intends to pay the teachers at one of the School-Houses in different Sections of the City, thereby enabling it is hoped many of the young ladies to come monthly to City Hall from distant portions of our City to receive their Salaries. It will also greatly simplify and facilitate the business of the Treasurer and Auditor's department. Should the State tax not be increased over the maximum as I have placed it with the increase of taxable property by the completion of Roxbury, there will be a considerable reduction of the tax from last year to meet the amount required by their estimates. The tax levied by the City of Boston rests at the rate $15.30 on each thousand dollars of property and by the City of Roxbury $19. Annexed to this report will be found the communications which I have received from the several boards, departments and committees, giving in detail the items which comprise the totals of the respective demands, all of which I respectfully [illegible] Upon the Estimates of Expenses thus presented to the Committee on Finance with such as the Board of Aldermen may join, with power to print, I come up for consid-

rence. Read and concurred and Aldermen Isabel, Jones, Fich- March 9 1880

Church Street.

The joint Special Committee on whom was referred so much of the Mayor's Address as relates to the Church Street District, have considered the subject, beg leave to submit the following Report:- The territory comprising that known as the Church Street District lies between Pleasant Street and Ferdinand Street, Tremont Street and the Providence Railroad, and covers an area of about sixteen acres. The sewers first established there had an outlet into the ex-flats in the Back Bay; and as the water in the basin did not rise more than two or three feet above low water, no difficulty was experienced in the drainage, although the grade of a large portion of the territory tributary to Tyler Street was not more than five or six feet above mean low water. As the population increased in the southerly section of the city, the large quantity of sewage matter discharged into the empty basin created a nuisance dangerous to the public health. It was found necessary, therefore, to devise a system of drainage which would carry a portion, at least, of the sewage into deep water. As a part of a plan [illegible] into Charles River at the foot of Otter Street, and which was intended to afford satisfactory drainage to the whole district. [illegible]

sewer. The sewers below Church Street, on the west,

[illegible] during the year 1861. And that year, the Flint
Power company began to fill their flats; and, in
order to satisfy the parties who held a right of drai
age into this basin, they built an intercepting sewer
along the line now represented by Ferdinand Street.
As the company continued to fill the flats on the
southerly side, the sewer was extended, from time to
along the line of the Worcester Railroad, until it now
reaches to Dartmouth.

2 nd. The height to which the water rises in the
Bay, on account of the action of the Flint Power com
pany and the gate, has rendered this sewer at the
present time quite worthless. It appears, then,
that drainage into any waters having a lower level
than the ordinary tide-waters, has been prevented; and
that the only remedy is, to raise the grade of the terri
tory. This conclusion is not a new one. The necessity
for such action has been clearly foreseen for a number
of years. The subject has been before the
every year since 1863, but it has been i
possible, heretofore, to perfect a plan satisfactor
to [illegible]

The Water Power company, the city, and the occupants
and owners of the territory. To such the condition in
relation is presented to this Governor. It
is according to reason, to say, the action of the city
will during the past two years. Upon the application

of a Committee of the City Council, in 1852, on Petition
passed by the Legislature, in addition, and enlarging the
City to purchase, or otherwise take, the lands and flats
with the buildings and other pictures thereon, situated
and lying between Boylston Street and Tremont Street
[illegible]

ment with the owners, the damages for taking them
were to be determined in the manner provided in the
cases of laying out Railroads and Highways. The
[illegible] Aldermen were authorized to fill up the
[illegible] to a grade of not less than twelve feet above mean
[illegible] water, and to lay out such streets and avenues

the plan for immediately improving the drainage
April 3, 1868 territory. On the 13th of December, they reported, that the
state of the territory was such that the work of improving
it should be commenced without delay; and ordinances were
accordingly prepared for adoption, authorizing the Committee on
Paving, with the approval of the Mayor, to contract for
raising all the streets and places to the grade of eighteen
feet above mean low water, filling up the cellars and back
yards, and underpinning the houses and outbuildings, at
an expense not exceeding $500,000 - the owners to make all
necessary repairs upon their buildings at their own cost,
and to make no claim upon the city for damages on account
of the change of grade. The subject in this shape was
recommitted to the Committee of the whole Council. Near the close of the year, that body,
without much discussion, it was referred to the next City
Council. During the consideration of the subject
by the Committee of the whole Council,
any obstacle being thrown in the
way of such improvements, as the Government might
suppose it to make, a bill was promptly drawn by
Messrs. Latrobe and the City Solicitor, giving the city extraordi-
nary powers to act for the preservation of the public health.
The act was approved by the Committee, and passed by the
Legislature, on the 1st of May. The Committee proceeded to
take advantage of the provisions of the act in carrying out
the plans which they recommend, a copy of which is appended to this
report. Soon after the passage of the act, the Committee
[illegible]

that is four hundred fifty seven; the number of stores and other buildings, two hundred; the number of families, eight hundred sixty seven; and the number of persons, three thousand five hundred twenty eight. The average value of the dwelling-houses is about two thousand five hundred dollars. No argument is necessary to demonstrate

able families could be made, even gradually, without positive hardship to some; and no payment or money for present value of their estates, however liberal, would altogether prevent the hardship. This location is well adapted to the wants of the city which occupy it. It is not needed now, and there is little prospect that it ever will be needed, for business purposes, or for expensive residences. It does not appear desirable, then, in any point of view, that the city should spend a million dollars or more in clearing the territory and laying it out on a new plan, instead of doing it [illegible]

impartially, and with a view to the best interests of all concerned, your Committee have come to the conclusion, that the property should be taken under the act of the Legislature to prevent any delay in the work, but that the city should

give a bond to convey the estates back to their original owners, after the improvements necessary to abutters have been made. The plan proposed by the Commissioners may be stated thus: 1. To take all the land, between the grade hereinafter mentioned, and the district described in chapter 305 of the acts of the year 1867. 2. To raise the streets and (B) Faneuil to the grade of eight feet above mean low water. 3. To fill the inland, back-yard, and vacant [illegible] to raise and underpin such of the buildings as Commissioners hereinafter mentioned shall deem expedient. 4. To lay water pipes, sewers, and edgestones. 5. To give bonds to the former owners to return the estates (or such portions as are not required for streets or other purposes), after the above-mentioned improvements have been made; provided said former owners will make all necessary repairs upon the [illegible] returned to them after the raising and underpinning, and make no claim upon the city for damages. 6. To appoint three Commissioners, who shall, under the direction of a Committee of the City Council, have general supervision of the work. It is not proposed to confide with this plan, which has for its object the preservation of the public health, any plan for the widening of the [illegible]. After the lands are taken, the Board may judge that the public safety and convenience require the widening of Tremont Street, or any of the other streets and places, they can order such wi-

ers. From estimates which they have made, the Commis-
sioners believe that the plan, of which they have given an out-
line above, can be carried out in less time, and at less ex-
pense to the city, than any plan heretofore suggested. The
following estimates are furnished by the city S.

20,000 Square yards of filling @ $3.00,	$60,000
Paving and Street crossings,	56.00
Edgestone and Sidewalks,	20.000
[illegible]	[illegible]
Raising Water-pipes,	8,000
Street Bridges,	1,200
Total cost of raising grade of territory,	$251,700
The cost of raising and underpinning the build-	
ings, according to estimate by D. B. Brown,	
would be,	315,000
Total cost of raising territory and buildings,	$566,700

The assessors' valuation, in 1867, of the real estate on this dis-
trict, was $1,592,100. From this should be deducted, on account
of land and buildings not included in the taking, $202,000
leaving $1,390,100 as the assessors' valuation of the property
to be taken. To this should be added twenty per cent.
true valuation, and we have $1,668,120. Upon the

after the improvements shall have been made, to pay the original cost. Moreover to the city, therefore, would be confined solely to raising the land and the buildings. Many of the streets and places are private property, but they have been used by the public so long that probably enormous damages would be assessed by a commission or a jury for buying them. Making a liberal allowance for contingencies, we believe that the net cost to the city of carrying out the plan proposed will not exceed the sum of seven hundred thousand dollars. It will probably take two years, at least, to complete the work. We have, therefore, to make an appropriation for the entire cost at this time two hundred thousand dollars will be sufficient for the operations of the present year; and we have appended an order to that effect.

We could not, however, unless it comprehended the extension of Columbus Avenue, in some way, to Park Square. The Committee have given that portion of the subject very careful consideration; and, in order to bring it directly before the parties having the largest interest, they have submitted certain propositions to the Board of Directors of the Boston and Providence Railroad Corporation, in substance as follows: First,- To remove [illegible] to allow the extension of Columbus Avenue, eighty feet wide, to Park Square. Second- To close Church Street, between the northerly line of Columbus Avenue, extended, and Providence Street. The Directors have signified their readiness to co-operate with the City in carrying out the general plan pro-

Whereas, by an Act of the Legislature of the Commonwealth of Massachusetts, passed the first day of June, A. D. 1867, entitled, "An Act to enable the City of Boston to abate a nuisance existing therein, and for the preservation of the Health in said City," it is provided among other things as follows, viz:- Section 1. The City of Boston may, by its proper officers, take the lands or any of them in said city, [illegible] within the district bounded on the northwest by the northwesterly line of Commercial Avenue, extended to Church Street; on the north by the line of the southerly side of the passenger station of the Boston and Providence Railroad Corporation, and the same extended to the westerly line of Church Street; on the east by Pleasant Street; on the southeast and south by Fremont Street and the Boston and Worcester Railroad; and on the west by Ferdinand Street. aggrieved in the assessment of damages
damage done to him by the said taking, the same shall be
paid to him by the said city; and it shall be the
duty of the city of Boston forthwith to record the order of
said taking so taken or purchased, laying out and filling
up the same with good material, with reference to a com-
plete drainage thereof, so as to abate the present nuisance
and to preserve the health of the city, and in no wise to af-

Independence

The Joint Special Committee appointed to make suitable arrangements for the celebration of the fourth of July, 1868, by leave to report, that they have prepared a programme for the celebration of the great national anniversary, which, they believe, will afford the highest satisfaction to the citizens of Boston, and attract a very large number of people from the surrounding cities and towns. In order to provide for the expenses of carrying out the programme it appears that an additional appropriation of ten thousand dollars will be required, making the total appropriation for the celebration twenty-five thousand dollars. This sum has been expended on a former occasion when the entertainments in which the citizens could participate were much less varied and attractive than those which this Committee propose. The increased addition to the city, in area, population and interest, should be taken into consideration in passing upon the increased expense for such an occasion. The Committee would respectfully recommend the passage of the accompanying order. In the Committee [illegible] Common Council, [illegible] ten thousand dollars be added to the appropriation [illegible] for the celebration of the fourth of July 1868 and that the same be charged to the appropriation for Incidental Expenses. The Joint Special Committee Washington
to whom was referred the communication from the Citizens' Com- Statue
mittee on the Washington Statue, beg leave to submit the fol-
lowing Report: On the fifteenth of December 1859 the following
order was passed by the City Council, concurred by the Mayor:
"Ordered, That in the opinion of the City Council, it is expedient
to aid in the erection of an Equestrian Statue of Washington upon
Boston Common, by an appropriation of five thousand dollars
in money, and by authorizing the payment out the City Treas-
ury of a further sum sufficient to defray the expense of erecting
a Pedestal for said Statue, provided it shall not exceed five thou-
sand dollars; said appropriation to be made whenever the
Committee of Citizens having in charge the enterprise shall com-
municate to the City Council that the sum of [illegible] and
the sum of five thousand dollars, added to the sum then in
the hands of that Committee, raised by public contribution or
otherwise, will defray the whole expense of purchasing and
erecting the Statue as proposed, exclusive of the cost of Pedestal."
The Citizens' Committee in their communication to the City Council,
dated April 22d 1868, represent "That the cost of the model, namely
$2,000 has been paid to the Artist, Thomas Ball, Esquire, by the
Committee, and that the model is now in the hands of the
founders, Messrs. Ames Company at Chicopee, Mass. for casting;
That the price to be paid for said casting is $15,000, besides any

ornamental work and that the transportation and other expenses will increase said sum perhaps $1000; that said Committee have on hand the sum of $12,000, also $100 not collected; that the sum raised by the said City Government will be sufficient to complete the payment for erecting said Statue, and that the founder aforenamed ought to finish the casting during the present Summer. The Committee also state that "the nature of the ground in the Public Garden, where the Statue is to be set up, requires that the foundation be firmly laid before placing the Statue on the pedestal; and in anticipation of the speedy completion of the work, they now ask that the sum hereafter voted, be appropriated by the government, and paid over to the Treasurer of the Committee. Your Committee have conferred with the Treasurer and Secretary of the Citizens Committee, and have received satisfactory evidence that the provisions of the order passed by the City Council on 1859 have been complied with, and they would recommend that the Treasurer apply [illegible] to work of [illegible] - - - will be finished in September or October next, and vested, - in accordance with the request of citizens who have subscribed to the fund for its erection on the Public Garden, between the Bridge and Commonwealth Avenue. The cost of the pedestal will be about $12,000. The passage of the accompanying order is respectfully recommended. For the Committee, Samuel Eliot, Chairman. Ordered: That there be paid to the Treasurer of the Citizens' Committee on the Equestrian Statue of Washington the sum of ten thousand dollars for the purposes designated in the vote passed by the City Council and approved by the Mayor December 16. 1859, said sum to be transferred for that purpose from the Reserved Fund. Health appropriation

The Finance Committee to whom was referred the Ordinance No. 60 to be entitled to repeal such allowances in the Ordinance in relation to the Health Department as may be found unnecessary, and to make further provision in that behalf, beg leave to submit the following report. By the seventy-seventh section of the Public Health Act, it is provided that the City Council may constitute either from among, or any committee of their number, which shall have all the powers, and perform all the duties required to such a Board by Statute or by Ordinance. In 1853, the City Council passed an Ordinance establishing the office of Superintendent of Health, and transferred to this department certain duties previously performed by the Paving Department. [illegible] by the Health Department [illegible] and cleaning of the streets, the cleaning of cesspools, and the removal of snow and ice from the public walks, being upon a strict construction to the Board of Police and Health, powers conferred upon them by the forty-first Section of the Act. [illegible] found more economical to have the

532
May 25. 1868

department when employed a large number of men in the collection of water Rent, also perform certain other duties, de- [illegible] with the Board of Aldermen, which require the same kind of time and the same class of laborers. As long as the Board of Health is identical with the Board of Aldermen there is no objection to such an arrangement, as this can be complied with readily; but when it is proposed to transfer the powers of a Board of Health, or the control of the Health Department, to a Committee of the City Council, as these duties not strictly appertaining to a Board of Health will be imposed upon the Health Department, and it would be in some other way. This would involve changes in the [illegible] which would [illegible] without cause, and lead to endless confusion. The practice of the proposed change in the control of the Health Department is not [illegible] with the [illegible] attached to the appropriation for the Health Department, namely: That no part of the appropriation shall be expended, un- [illegible] by a [illegible] of the City Council. The effect of this proviso is to prevent the Board of Health from making any expenditure in the absence, and the preservation of the public health, unless a Joint Committee of the City Council approve; and, where the expense will exceed two hundred dollars, the [illegible] of the City Council must first be obtained. The Committee are clearly of the opinion, that a Board of Health, to act efficiently, must have entire [illegible] of the annual appropriation by the City Council, and they believe that any change in the constitution of the Board would be [illegible] to the [illegible] of the City [illegible]

said Charter, respectfully recommend the passage of the accompanying order. Per the Committee, Ralph T. Reed, Chairman.

Ferries

The Joint Special Committee on the East Boston Ferry, who were authorized, by an order of the city Council, to grant the use of the landings, slips, docks and buildings, formerly occupied by the Federal Ferry Company to the East Boston Ferry Company, upon such terms and conditions as they might deem for the best interests of the City, beg leave to submit the following Report. After hearing given to the Trustees of the East Boston Ferry Company, the counsel for that corporation appeared before the Committee and stated, that the East Boston Ferry Company, having located a location; that the Trustees had applied to the present Legislature for an extension of their charter, and for authority to occupy other locations approved by the Mayor and Aldermen; that the application was refused, owing to the opposition of the City; and that the East Boston Ferry Company could not, without taking the risk of paying for all the damages caused by collision, run their boat between the landings owned by the City. Under the circumstances, therefore, the East Boston Ferry Company would not take a lease of the landing, slips, &c. which had been filled up for them, but the Citizens Ferry Company, chartered in 1836, desired to occupy the landings upon the same terms and conditions that the city had proposed to the East Boston Company. As the charter of the Citizens Company also provided that a Ferry should be established and opened to travel before the third of May, 1852, the slips and landings must be granted for their use before that time, or it would be necessary for the Company to take them under the right of eminent domain. The only question, therefore, presented to the Com-

The subject was duly considered by a Committee of the City Council in 1856, and their report is contained in City Document number 83, of that year. The Committee proceeded in finding a consolidation of the two companies, and recommended to the City Council that the Wells and Conduits of the old Jackson Mfg Company should be put in complete repair for the use, upon certain terms and conditions, of the [illegible] Company. [illegible] [illegible] [illegible] [illegible] [illegible] Building at an expense of over $50,000. To prevent [illegible] binding upon the question, the Committee of [illegible] requested the Directors of the Coal Boston Company to state whether they were prepared to run fires between the Conduits which were being filled up by the City. The President of the Company appeared before the Committee and stated [illegible] would [illegible] [illegible] as soon as the City would give them a use. In February of this year, the following communication was sent into the City Council & to Consider the City Council of the City of Boston:

The Coal Boston Fire Company hereby signify their offer to run [illegible] the City [illegible] Fire Engine Company and [illegible] Fire Engine Company. By Hand Engines, Connected for the last year, which have elapsed since the re-organization

May 25 1868

of the East Boston Company, not a word has been said about any such difficulties in the way of running boats to the slips which were being filled up by the City. The only restriction in the original charter of the Company, in regard to the location of their ferry, was that it should not be located north of the north line of Battery March. The landings owned by the City are south of that wharf; and, in the opinion of the City Solicitor, the Company, in locating one location, did not exhaust its right to locate another within the limits prescribed by the act. If the Company, however, have obtained a contrary opinion from an able Counsel, there is no objection to a special act of the Legislature granting a new location. The whole of the City Government would willingly accede any opposition. What the citizens of East Boston especially oppose is an extension of the charter of the Company at this time. The charter does not expire until 1872, and if the Company furnish such accommodations to the citizens of East Boston as the public convenience, and as they have a right to demand, there will certainly be no objection, two or three years hence, to an extension. Respectfully submitted. For the Committee, Nathaniel Greene, Chairman. In Common Council. Read and accepted. Came up for concurrence. Read and concurred.

Health Sanitary Survey

Ordered that the Committee on the Health of the City, so far as possible, those causes and sources of disease which are in constant operation within it, and to place the City in a proper state of preparation for the epidemic which may visit it next Autumn, it is hereby ordered:

1. That the Chief of Police is hereby directed, under the advice of the Committee on Health, to cause a thorough and systematic examination of the whole City to be made by the Police Officers of the several districts, so that the best information may be had of its sanitary condition, and to provide the necessary means to be taken for its improvement. 2. That the Police Officers of the district, or those who may be especially detailed for the purpose of executing this order, shall carefully inspect and report in writing, daily, to the Superintendent of Health

all sheds, lanes, courts, passages, common sewers, houses, rooms, cellars, yards, or vacant lots, which require cleansing; and in case it shall, from any cause, be deemed cleansing is required, they shall specify that fact. 3. When any nuisance or other cause of disease is discovered, notice, in the proper form, shall be served upon the owners, agents, or occupants, to forthwith abate the same, and in case of refusal or neglect for a period of twenty-four hours, the Superintendent of Health, or his assistant are authorized and directed to cause the same to be abated or removed in the most summary manner; and for this purpose they are hereby authorized to call for such additional assistance from the Chief of Police and other officers of the City as may be required to effect such abatement or removal. The expense of such removals or abatements of nuisances (of which an accurate account is to be kept) shall be chargeable to the owners or occupants of the premises. 4. All persons acting under and by the authority of this order, are hereby authorized to enter upon and into any premises which it may be necessary to visit in compliance with its provisions; but their object in so doing must be first stated to the occupants, and all unnecessary annoyance to them most carefully avoided. Passed. Approved by the Mayor, May 29. 1868.

Fountain, the Committee discovered that the material known
as Portland cement was necessary, and that such
it is to be a considerable cost and expense to the City. As this
was a contemplated improvement of the greatest beauty & use to
the people, decided to have the fountain made of pure bronze.
As they may be considered as finished and worthy of record,
a little mention being made fully in relation to the fountain.
It was at the meeting of which Governor Yates the Lieut
Gov. and Friends of their establishment in Peoria. The de-
sign is by Diebold, and the statuary from the studio of Mulli-
gan, Ryan, the artists of great repute. The four large figures
at the base represent Agriculture, Mechanics, Industry
Art, Science and Peace. The Female figure at the top and most
ornamental. It gives me pleasure to inform you that the foun-
tain, with the basin, pipes and other appendages pertaining to it,
has been placed in the position selected for it by the Committee
in the Summer, and is completed and ready for use. There
having been a very little water flowing through the pipes, owing
to the inclement weather in the Fall and most disagreeable season, which I beg leave to place it upon to day in
your charge for acceptance. Gen. President Sewall Gardner
Parker, Esq. and Hon. Wm. Holcomb James submitted
the following Resolutions and Order, viz: Whereas the Fountain
recently erected in Jubilee Square, has this day delivered to this City

...and their views upon the best method of providing & maintaining a system of ventilation for some of the principal apartments in the City Hall. In response to their invitation, communications were received from Messrs. Thomas, Young, Boyd, & Thompson, Mr. Dungan & Co, and Messrs. Gay and Mann. The communications, with accompanying explanations and estimates, are appended hereto. A number were invited to each of the persons making the propositions, and each apparently was afforded by such full opportunity as they might desire to make ... After a careful consideration of the various propositions, the Committee are unanimously of the opinion, that it would be inexpedient to adopt either of them. They are confident that a ...

Mr. Dick in the ceiling and Sewers over the Staircase Hall, and, the
introduction of proper Ventilating Ventilators outside the roof. The ven-
tilation of the Cupboards opening directly into the Staircase
Hall can be greatly improved by the introduction of openings in
the walls, provided a proper supply of pure heated air is ad-
mitted into the room, and the Cupboard doors, to draw the vi-
tiated air into the Staircase Hall. It is supposed, that when
the ceiling and skylight are removed and Ventilating pro-
perly introduced, the Staircase Hall will act as a powerful chim-
ney in drawing the vitiated air. It would be part of the plan
to introduce Hot water radiating pipes, or apparatus, for warm-
ing the air, either by one of the steam pipes passing
into a Warm Room, the Cupboard doors could be so fitted
drawing the Staircase Hall to be supposed, ventilating the
cupboards they would supply in the ceiling and skylight, and also
the location and arrangement of the underground drawings into
the area from the principal apartments surrounding it. If the

Passed, by their unanimous. If the City Council should adopt the plan proposed, and it should be found, upon trial, inadequate to accomplish the desired result, then would there be any power in the Legislature to assess the alteration. The Committee would therefore respectfully recommend the passage of the accompanying order. In the Committee, Francis Richards, Chairman. Ordered: That the Committee on Public Buildings be authorized to make such repairs and alterations in the pool, after consulting and obtaining the City Physician as they may deem expedient, for the purpose of improving the ventilation, the expense thereof not to exceed the sum of three thousand dollars, to be appropriated for that purpose from the Reserved Fund in the appropriation for Public Buildings. to provide some manner which might satisfy those of our fellow citizens who believed that the public money devoted to the support of the Police Department was spent without regard to those principles of good economy which should prevail in all departments of public trust. We believe that those who are disabled by sickness or otherwise, in the discharge of the glorious Republican duties which the faithful police officer is called upon to perform, is within the sympathies and kind consideration of the government; and although we would not perhaps recommend any measure which would include the entire support of an officer and his family, under circumstances of good economy should recommend such relief as would tend to his help, while laboring under such disability. I believe that it would be well for us sympathize to over so much excited, let the appeals be carefully to over so urgent; let our desire to aid or relieve be over so ardent; we are a republican government, entirely incapable to act, in consequence of legal disability. For the fulfillment of our charitable sympathies, we act illegally, and without the least show of authority. As an organized government, we are civil trustees, and can expend no funds in any charity or gratuity, which will not be sustained by legal enactment. Justice and common charity demand that something should be done for officers temporarily disabled in the service, and the aid which is rendered should be impartial, and according to the exigencies of the case presented. With a view to remedy existing deficiencies, and to base our future action upon [illegible] the passage of the following order. To the Committee, &c. Ordered, That the Chief the Mayor be, and is

heard: decided to petition the Legislature in the name of the Mayor and City Council of Boston for the enactment of a law, authorizing the City Council to appropriate money to police officers who shall become disabled in the performance of their duties, under the direction of some appropriate Committee, appointed or elected by the City Council. Police Force increased

The Committee on Police to whom was referred the report of the Special Committee on the subject of government & discipline of the Police Department & Service not ordered by law to submit the following Report. It is provided in the 169th Section of the rules and regulations adopted by the Board of Aldermen for the government of the police department, that firemen wounded or otherwise disabled while in the performance of their duty, shall receive pay for their period of service necessary lost in recovering, when duly certified by the City Physician, or other Physician appointed by their respective Captains for them, upon approval by the Mayor and the

Committee on Police. In case of ordinary sickness pay will be June 15 1886
allowed for three days upon the report of the surgeon, and for
ten days and never more than credited to by him out of the City
Hospital. It is the opinion of the City Solicitor that the Board of
[illegible] the faithful performance of police duties, fixed the
Commonwealth and the ordinances of the City. So far as the
Committee have been able to ascertain, all payments made to
police officers, during their inability to perform regular duty, have
been accurate and just, and they believe that a more
[illegible] this matter, would meet with the hearty approval of the citizens.
The rules of this Board are more stringent than those adopted upon
the same subject in any other large City in the country, very much
more so than those adopted by the Metropolitan Board in New
York. Believing that the City Council have sufficient authority
at the present time to make a reasonable allowance to police
officers during absence from duty on account of sickness, so faith-
fully conducted in the service, and that the enactment of a law
giving the City Council unlimited authority to pension officers in
certain circumstances, lead to unnecessary and inappro-
priate expenditures of the public money, they would respectfully
urge, that, in their opinion, it would be inexpedient to pass
the order recommended by the Special Committee of the Com-
mittee, Samuel C. Cobb, Chairman. Read and accepted

City Council proceedings

The Joint Standing Committee on Printing to whom were referred, as a part of their unfinished business of last year, the papers relating to the [illegible] ing in some daily paper, the proceedings of the business meetings of the Common Council, beg leave to submit the following Report:- It is very desirable that the citizens of Boston should be better informed than they have heretofore been, in regard to the business transacted by their City Government. They would, undoubtedly, feel a greater interest in municipal affairs if they were so informed. The daily papers have heretofore reported, and published, such brief sketches of the proceedings of the City Council as they

could afford space for without special compensation. It gives a very limited idea of the proceedings of the government; but it is all that can be expected unless compensation is made, as such a publication is only of local interest. [illegible] of the City Council, would tend to produce a stronger [illegible] of the members of the City Council than they now possess. If this result can be secured, it would more than compensate for the small expense to be incurred in giving to the public the proceedings [illegible] the opinion, that it would be expedient to publish the proceedings [illegible] and that a committee be appointed to procure the publication of the accompanying order. For the Committee, Newton Talbot, Chairman.- Ordered: That the Committee on Printing be authorized to contract with the proprietor of one daily paper in Boston, to report and publish an abstract of the business and proceedings of the meetings of the City Council [illegible] the first day of July, 1868, at an expense not to exceed twenty five hundred dollars. The same to be charged to the Appropriation for Printing. Passed in Common Council. Came up for concurrence. Read and laid on the table.

lowing report, for the information of the Board, in re-
lation to the streets on the Back Bay territory lying north
west of Boylston Street and between [illegible]
Street and Fenway. The [illegible]
and grading of these streets is becoming a question of
great importance to the city [illegible]
accepted, and they are laid out [illegible]
tion of the Board of Aldermen. The streets to which

not allow of the bridges over the railroad
of these streets and the [illegible]
of the railroad without [illegible]
and bridged over the railroad at such height as will
seventeen feet above the rails. The committee have be-
informed that there is no agreement between the Wa-
ter Power Company, the Railroad Company and
the [illegible] in reference to the construction
of the bridges required to cross the railroad with the
Road but a railway grade [illegible] about twelve

July 6 1868

feet per mile, the grade of the streets will be along about
up the river and would have to be raised about two
feet filling from two to twelve feet, according to
their relative location, and in many places would have
to be raised (Chicago datum) about
which is eight feet above mean low water. As several
parties have already commenced building on two
or three of the streets, without any authorized grade
having been given them, and in order to prevent the mis-
take of [illegible] them to build on a lower grade than
would be acceptable to the city, it is important that
immediate action should be taken by this Board to secure
a definite system of grades that would allow ei-
ther of the streets already graded to remain undisturbed at
a proper height should it be required, and still
permit the adoption of the proper grade by the
streets it will in the future be necessary to have pass
over the railroad [illegible] to bridge all
of the [illegible] to grade all of the streets with a view to that end. The
[illegible] have expressed
themselves willing to enter into a liberal agreement with
the city by which the said streets can be graded as the
[illegible] of the city engineer; and they have ex-
pressed their willingness to abandon the marginal
street as laid out by them, thirty feet in width, bord-
ing on the railroad, which street the Commissioners are of the
opinion [illegible] retaining wall, about 2800 feet in length, between Dart

mouth Street and West Chester Park; whereas if this street were abandoned, retaining walls would be requir- ; 15 ; May 6 1868.
ed over all the ends of the streets (the abutments serving for that purpose.) Between the streets, the walls of the houses and lots would take the place of a general re- taining wall - of course the expense falling upon the
[illegible]
pose, if this street is abandoned, to lay out a ten foot
[illegible]
parallel with them, for the accommodation [illegible]
and a turning place at the end, with a road of sufficient size to allow city carts, &c., to turn round in.
The Committee understand, however, that this street cannot [illegible] be abandoned, unless by the consent of all the parties to the Deed of Dedication. It is estimated that it will require about 500 square yards of earth to com- plete the grading of this street to the true grade, as pro- posed. This earth could be procured with very little allowance for side slopes, as the earth in the ridges would thus be excavated, with some benefit to the ad- jacent lots, and the streets, and for the reason it will be best to grade them somewhat narrower on top than the full width of the streets. The Committee herewith submit a plan showing the streets with grades of the same, and also the proposed passage-ways between the streets. For the reasons above [illegible] the Committee would recommend the passage of the following order: Respectfully submitted, Newton Talbot, Joseph F. Paul, Edward A. White, Committee. - Ordered

wooden building, [illegible] Broadway,
Street, and made by the real-estate owners in the
vicinity, and before the Society had reason to believe
that any remonstrance would be made. Under
these circumstances, it became a question if
to withhold the license to build, as it would to refuse
to legalize the structures already erected without au-
thority, if an application should be made.
The Committee would therefore respectfully rec-

Alderman Richards then submitted the following Minority report, viz:- The undersigned, a minority of the committee, to whom was referred the petition of Hiram A. Bowles and others, that leave be granted to the Broadway Universalist Society, to erect a church on Broadway in South Boston, feel constrained, from a sense of duty, to differ from the conclusion at which a majority of the committee, have arrived. The ordinance passed by the City Council in 1850, based upon the special act of the Legislature of the same year, is, of course, to be taken as the settled policy of the city, as regards the question of wooden buildings in East Boston and South [illegible] the size of wooden buildings have much [illegible] to-day. During this interval of eighteen [illegible] number of houses in South Boston has more than doubled; and it is well known that the danger from

is greatly increased, when wooden buildings are located on compactly built streets. The records of the [illegible] has been granted, to build, a wooden structure, exceeding the limits prescribed, by the ordinance, of 1850; and if leave was granted in the present instance, it would be an unprecedented departure from a long established policy. It cannot properly be urged in support of the present petition, that numerous wooden structures have been erected, without authority. If the real estate owners in the vicinity took no steps at the time, to prevent the erection of these structures, the City Council did not feel, called upon to take, any action in the matter. But when objections are made by persons whose property is adversely affected, and the City is called upon to take positive action against its own settled policy, a very grave question presents itself. If the [illegible] by the City Council [illegible] they should be departed from in this instance, there is no reason why they should not be in other instances; and real estate owners, whose property may be [illegible] their vicinity, have no guarantee, as to the policy of the city. Under these circumstances, the undersigned deem it inexpedient to grant leave for the erection of a large wooden building on Broadway; and they would respectfully recommend, that the petitioners have leave to withdraw. Normal School

The Joint Standing Committee on Education, to whom was referred the request of the School Committee that early attention be given to the erection of a building for the Normal School, beg leave to submit the following Report: The subject of a school of this character, are (1) the unsuitableness of the present building for the purpose, and (2) the necessity for its enlargement. The first of these objections is the more serious. The lapse of time since the subject was first presented to the public, has increased the conviction that it is the duty of the State to provide for the wants of the present. Your Committee would hesitate to recommend any action at this time, in view of the numerous public improvements instituted by the present Government, were they not fully satisfied that a continuance of the prosperity of the school demanded it; and that the necessary accommodations could be furnished, without

involving the city in any large expenditure. As the pupils for the school are gathered from all sections of the city, the most important July 20 1868

for a new structure. The lot of land presented to the city by the Commonwealth, on the corner of Berkeley and Newbury Streets, was being considered as a suitable locality for such a school; but the objections to that locality have been strong enough to prevent any favorable action heretofore on the subject. The principal objections are these; the lot is too small, only large enough for a school building without any yard; it is not easily accessible from other sections of the city; it is not in a district which supplies at the present time, or which will be likely hereafter to supply, any number

on land of one-third the value; the character of the surrounding buildings would necessitate the erection

ning several lots of land in the central portion of the city, and not finding them entirely satisfactory, the attention of your Committee was called by a member of the School Committee on the Girls' High and Normal School, to the unoccupied land lying between

Latin School. The principal objections to that location for a Girls' School would not apply to a Boys' School. In addition to the saving in the purchase of land, which would be effected by the location on Newton Street, it should be taken into account as an offset to a large portion of the expense of a new establishment for the Latin School, that the Committee are satisfied that, in view of the prospective growth of population in the southerly section of the city, the location on Newton Street is the most desirable that can be obtained; and they would, therefore, respectfully recommend the passage of the accompanying orders. For the Committee, Edward A. Whitney, Chairman. Ordered: That the Committee on Public Buildings be authorized to procure plans and estimates for a building for the Girls' High and Normal School, to be erected on the land owned by the City on Newton Street, and that the sum of ten thousand dollars be appropriated for the purpose; said plans to be approved by the Committee on Public Buildings, and the Committee on Finance to report the amount required for the erection of said building. Ordered: That the Treasurer be authorized to borrow, under the direction of the Committee on Finance, a sum not exceeding fifty thousand dollars, to pay for the land between Newton and Pembroke Streets, for school purposes.
